

TSCP Quick Installation Guide

To install the TSCP program to the 2070 controller:

1. Transfer the "tscp221Mb001.tar" file and "restore_tscp221Mb001" file to the 2070 controller's /r2 directory (refer to the document "File transfer using HyperTerminal").
2. Run the installation "restore_tscp221Mb001" script file from the OS-9 shell command prompt with the command: \$ /r2/restore_tscp221Mb001 (\$ is the OS-9 shell command prompt).
3. Once the installation is completed, the screen with HyperTerminal should look similar to the screen shown below:

```
tscp.105: /r2/restore_tscp221mb001
chx /f0/cmds
tar xvpf /r2/tscp221Mb001.tar

del /f0/tscp/startup.tar -q
***** TSCP installation completed! *****
tscp.105:
```

4. After the installation is completed, reboot the 2070 controller
5. After the TSCP v2.20 has been loaded onto the 2070 controller, initialize the 2070 controller with the following keystrokes:
 - Press 9 (utilities)
 - Press 3 (RAM Initialization)
 - Press 1 (Caltrans 332)
 - Press * (press * to initialize controller)
